Sonicare's best plaque removal

- Removes up to 100% more plaque than a manual toothbrush*

PHILIPS sonicare

Standard sonic toothbrush heads
4-pack

HX6014/26

Highlights

Snap-on brush head

Easy brush head placement and handle cleaning

Reminder bristles

Reminder bristles let's you know when to replace the brush head. After three months of normal use bristles exhibit fatigue, and brush heads are less effective. Replace your brush heads every 3 months.

Maximize cleaning performance

Thoughtful design and precision engineering ensure that when this Philips Sonicare replacement brushes are combined with the sonic motion and flexible brushing modes, you get a thorough clean.

Contoured bristles

These Philips Sonicare electric toothbrush bristles are trimmed in a contoured pattern to fit the natural shape of teeth. The peaks and valleys along the length of the brush head are ergonomically designed to follow teeth topography and fit in between teeth so you're less likely to miss places when you brush.

Angled radial-trimmed bristles

The curved surface area created by angled, radial-trimmed bristles helps maintain contact with the surfaces of the teeth and gums as the brush head pivots, covering a larger surface area without increasing the size of the brush head.

Removes up to 100% more plaque

*Removes up to 100% more plaque from hard-to-reach places than a manual toothbrush
